
MicroColor[®] 3000 Reader

Desktop Reader

A full-size desktop microfiche reader which offers a high level of brightness for viewing colour microfiche.

The MicroColor Model 3000 can be specified with optional dual lens and dual carrier. When viewing our colour microfiche maps, the dual lens capability allows the operator to quickly locate a target area on the microfiche map by using the low magnification lens. Switching over to high magnification lens, it lets the target area to be observed in more detail. The dual carrier allows two microfiche maps to be loaded side by side in the same carrier.

This reader is manufactured for us by Eye-Com and has the following specifications:-
