## MicroColor® FR5 Briefcase Reader

---

### Colour Picture and Data Information on the move

The FR5 portable is a modern, compact microfiche reader built into a briefcase. The inside of the lid is fitted with a metallic projection screen which offers a brilliant and contrast-rich image. In combination with the 100 watt halogen lamp fitted, this viewer ensures that colour microfiche images are superbly reproduced. The high light output of this versatile reader also allows it to be used for wall projection.

The FR5 is equipped with revolving triple lens turret which allows three different microfiche enlargement lenses to be accommodated. Its "floating lens" system guarantees constant focus at all times. The briefcase has a robust double-walled, rigid-shell case with special crumple zones.

The self-opening precision microfiche carrier is supported on ball bearings and offers optimum smoothness in operation. The film carrier opens automatically when pulled out and locks for transit on closure of the case.

The international multiple connector makes it possible to operate the FR5 on 115 or 230 V or with 12 V car battery.

### Specifications:

<b>Screen Size:</b>	11 7/8 " wide x 11 7/8 " high (300mm x 300mm), metallic non-glare
<b>Magnification:</b>	24x / 42x / 48x
<b>Dimensions:</b>	31½" high x 8 1/3" wide x 12 2/3" deep (800mm x 210mm x 320mm)
<b>Weight:</b>	13 ¾ lb.. (5.8Kg)
<b>Lamp:</b>	12V 100W
<b>Carrier:</b>	4" x 6"
<b>Electrical:</b>	110/120, 220/240 or 12V
