World Watch™ Global Timepiece and Screen Saver for Windows™

Displays real time for locations throughout the world. See the time for locations you create, or select from over 475 predefined cities. The illuminated pattern on the map delineates those areas of the world currently experiencing daylight. This pattern highlights the progress of the seasons, and displays sunrises and sunsets as they happen. Individual digital clocks display local times and update continuously. The global daylight savings time adjusts automatically. You have complete control of World Watch™ for size and position of display.

The additional World Watch™ Screen Saver combines the practical use of your system and the World Watch™ software.

ウィンドウズ対応のワールドウォッチは、世界中の都市の現地時間を表示することが出来ます。475の都市に設定されている都市や自分で設定した都市の時刻を調べてみましょう。地図上をクリックしカーソルを動かしてある部分は、現在、日光を受けていることを表示しています。この情報は、季節の進行を強調し、日の出や日没が起きる度に変化します。個々のデジタル時計は、その場の時刻を表示し、自動的に更新してきます。グローバルなデーライトセービング時間は、国際法に基づき、自動的に調整されます。完全なウィンドウズ上での、サイズやポジションのグラフィックコントロールが可能です。

材質のワールドウォッチスクリーンセーバーにより、自分のシステムとワールドウォッチを実用的に使用できます。
